EDUCATION

Bachelor of Technology in Cybersecurity (First Class)
Federal University of Technology, Minna, Nigeria

Jan 2018 - Jan 2024

RESEARCH INTERESTS

AI Security and Governance | Trustworthy AI in Cybersecurity | Adversarial AI and Model Robustness | AI Powered Malware Analysis & Threat Detection

AI GOVERNANCE AND SECURITY RESEARCH

AI Safety Fundamentals Fellowship - Massachusetts Institute of Technology Artificial Intelligence Alignment (MAIA)

June 2026 - Present

- Collaborating with fellows across disciplines to analyze open problems at the intersection of AI security and governance.
- Completing structured technical curriculum on areas such as transformer architectures, reward misspecification and tampering, RLHF, and AI control frameworks through facilitator-led cohort study and independent study.
- Examining governance and legal dimensions of AI safety including compute governance and tort law liability frameworks as applied to AI systems.

Research Article- Governing AI Red Teaming: Lessons From Cybersecurity and Where They Break Down (Preprint in Progress)

- Conducted analysis of cybersecurity and AI red teaming practices, examining attack success rates, cultural bias and dual-use risks in AI systems
- Synthesized findings from 20+ sources including NIST guidelines and academic research to develop policy recommendations for risk-based AI red-teaming standards

Research Article- Adversarial Machine Learning in Cybersecurity: Threats and Defenses

- Examined adversarial ML attack types and their implications for cybersecurity defense systems.
- Reviewed emerging defense mechanisms against adversarial ML, analyzing 20+ papers.

Technical Report - Decentralized Blockchain-Based File Storage System

- Built a blockchain-based decentralized file storage system for 19,000+ users.
- Implemented a randomized access provisioning/de-provisioning feature to enhance security.

WORK EXPERIENCE

Governance Risk and Compliance Analyst - Cyberplural MSSP

April 2022 - Dec 2025

- Conducted comprehensive risk assessments aligned with ISO 27001 and PCI-DSS standards and worked on remediation strategies for client companies using both quantitative and qualitative techniques.
- Conducted policy reviews and monitored implementation according to industry required compliance standards.
- Facilitated hands-on security awareness workshops for over 100 staff of client companies.

Cybersecurity Support Staff - Cyforce Technologies

Feb 2022 - August 2022

- Worked directly with clients by providing assistance to resolve technical issues relating to client endpoints.
- As needed, went onsite to provide support with installation of physical security equipment and software.

TECHNICAL TRAINING & PROJECT

- Developed an ML-based network intrusion detection system using the UNSW-NB15 dataset, implementing privacy-preserving techniques for anomaly detection
- Selected to participate in the AI Control Hackathon (Red Team Track), hosted by HackOS and Horizon Omega, sponsored by Redwood Research and NVIDIA
- Amazon Web Service(AWS) - AI Practitioner Pathway
- Google for Developers Machine Learning Crash Course
- Anthropic - Building with Claude API
- ISO/IEC 27001:2022 Lead Auditor - Mastermind

LEADERSHIP AND PUBLIC ENGAGEMENT

Co-Host - Still Figuring Tech Out Podcast

2025 - Present

- Co-hosting a cybersecurity podcast targeting early-career professionals, covering topics such as AI in cybersecurity, emerging threats, OSINT, and historical cyber attack case studies, reaching 300+ listeners across Apple Podcasts and Spotify

Lead Organizer - Linera Developer Meetups

2025

- Organized 2 developer-focused onboarding sessions with over 50 developers to introduce and support blockchain development

Lead Host - Cybersecurity Experts Association of Nigeria Pre-Seminar Panel Session for the national CSEAN Conference

2024

- Hosted the technical panel session on "Leveraging AI for Advanced Threat Detection and Incident Response"

Research Lead - "Effect of Blockchain Technology in Cybersecurity" and "Cryptography" Research Projects

2021/2023

- Led research steps and provided detailed report on findings.
- Taught a group of 6, steps for encryption and decryption using asymmetric cryptography.

SKILLS

- **Programming & Scripting:** Python | Rust | JavaScript
- **Governance, Risk & Compliance:** ISO/IEC 27001:2022 | ISO/IEC 27005:2022 | PCI-DSS | SOC 2
- **Machine Learning & Data:** TensorFlow | Scikit-learn | NumPy | Pandas | Feature Engineering | Model Evaluation | Performance Metrics (accuracy, recall, precision, F1, ROC-AUC) | Jupyter/Colab
- **Security Tools:** Metasploit | Burp Suite | Nmap | Autopsy | Volatility
- **Cloud & Systems:** AWS | Azure | Linux System Administration
